STEP 1. Open Microsoft Word

STEP 2. Copy the following text into a new file called formatting.docx

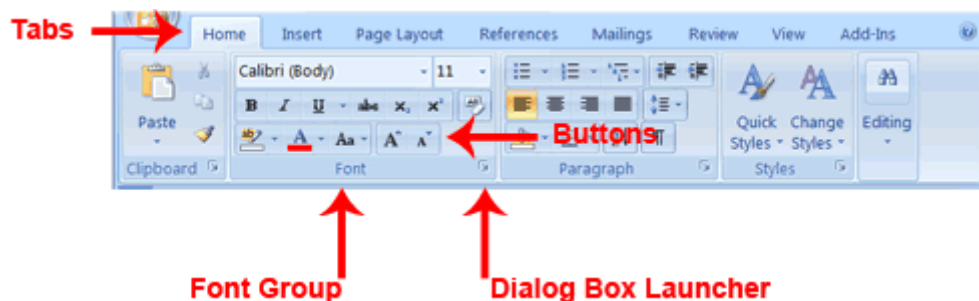

Every SETU student has access to their own personal Gmail account. Mine is 20001234@setu.ie

This gives you easy access to your emails, collaborate more effectively with shared calendar and documents, all without having to download any software to your device.

You can access your data from anywhere

The Ribbon

You use commands to tell Microsoft Word what to do. In Microsoft Word 2007, you use the Ribbon to issue commands. The Ribbon is located near the top of the screen, below the Quick Access toolbar. At the top of the Ribbon are several tabs; clicking a tab displays several related command groups. Within each group are related command buttons. You click buttons to issue commands or to access menus and dialog boxes. You may also find a dialog box launcher in the bottom-right corner of a group. Clicking the dialog box launcher gives you access to additional commands via a dialog box.

STEP 3. EXER: Format the font to Cambria size 11

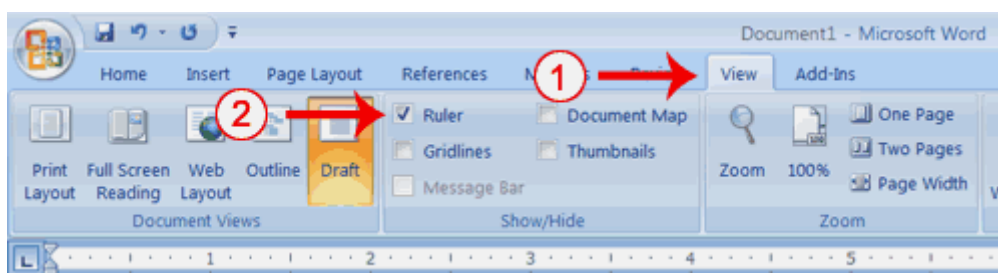

The Ruler

The ruler is found below the Ribbon.

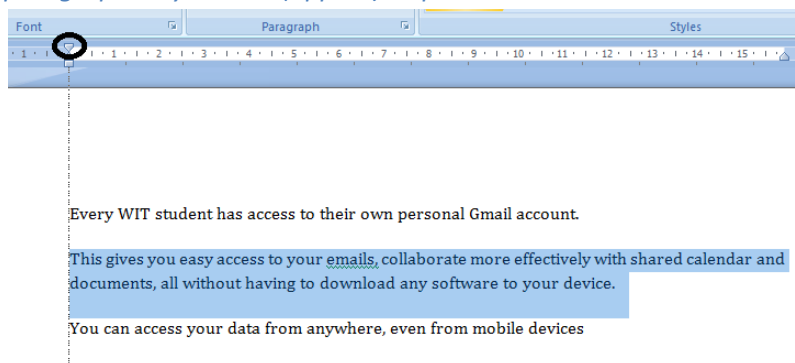

You can use the ruler to change the format of your document quickly.

Exercise: Turn on/off the ruler

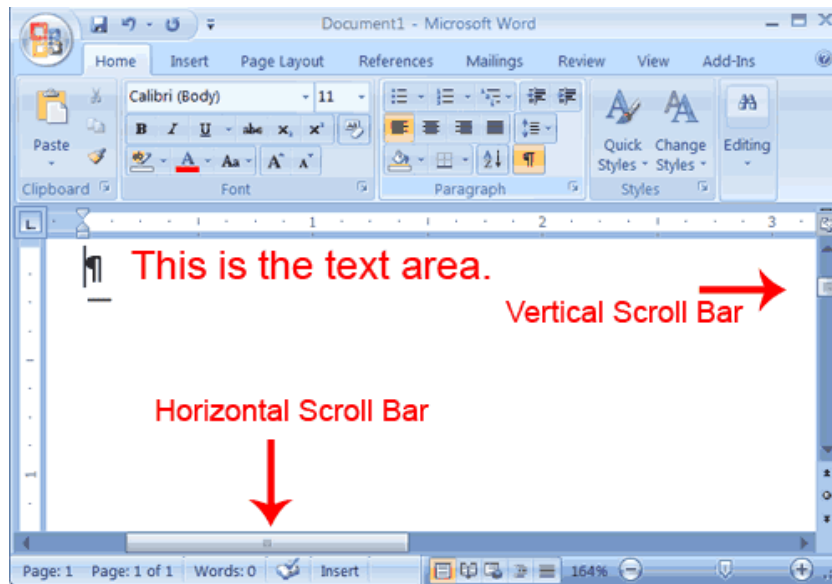

1. Click the View tab to choose it.
2. Click the check box next to Ruler in the Show/Hide group. The ruler appears below the Ribbon.

STEP 4. EXER: Use the ruler to increase the first line indent of the second paragraph only to 2cm (approx) as per screenshot below:

The Text Area

Just below the ruler is a large area called the text area. You type your document in the text area. The blinking vertical line in the upper-left corner of the text area is the cursor. It marks the insertion point. As you type, your text displays at the cursor location. The horizontal line next to the cursor marks the end of the document.

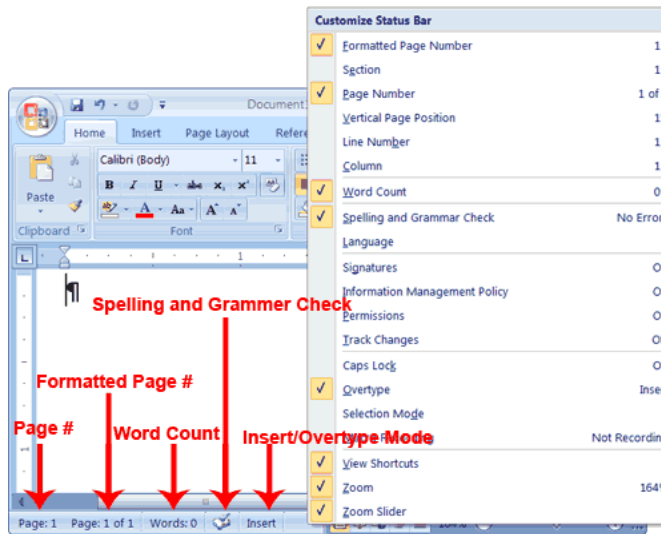

The Vertical and Horizontal and Vertical Scroll Bars

The vertical and horizontal scroll bars enable you to move up, down, and across your window simply by dragging the icon located on the scroll bar. The vertical scroll bar is located along the right side of the screen. The horizontal scroll bar is located just above the status bar. To move up and down your document, click and drag the vertical scroll bar up and down. To move back and forth across your document, click and drag the horizontal scroll bar back and forth. **You won't see a horizontal scroll bar if** _____

The Status Bar

The Status bar appears at the very bottom of your window and provides such information as the _____ and the number of _____ in your document. You can change what displays on the Status bar by right-clicking on the Status bar and selecting the options you want from the Customize Status Bar menu. You click a menu item to select it. You click it again to deselect it. A check mark next to an item means it is selected.

STEP 5. Exercise: Changing the Status Bar Views

1. Use the Zoom slider to change the document to (*approx*) 125%
2. Remove the Zoom slider from the Status bar
3. Use the Zoom percentage and view the document at *exactly* 108%
4. Remove the Zoom level from the Status bar
5. Turn both the zoom slider and percentage back on
6. On the Status bar, remove the shortcut that allows you to view the document in different views.
7. Turn it back on

Understanding Document Views

In Word, you can display your document in one of five views: Draft, Web Layout, Print Layout, Full Screen Reading, or Online Layout.

Draft View

Draft view is the most frequently used view. You use Draft view to quickly edit your document.

Web Layout

Web Layout view enables you to see your document as it would appear in a browser such as Mozilla _____, or Google _____

Print Layout

The Print Layout view shows the document as it will look when it is printed.

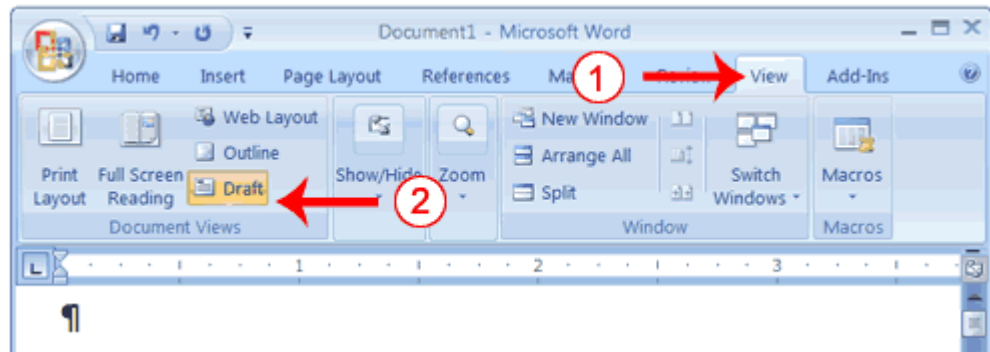

Reading Layout

Reading Layout view formats your screen to make reading your document more comfortable.

Outline View

Outline view displays the document in outline form. You can display headings without the text. If you move a heading, the accompanying text moves with it.

caroline.cahill@setu.ie

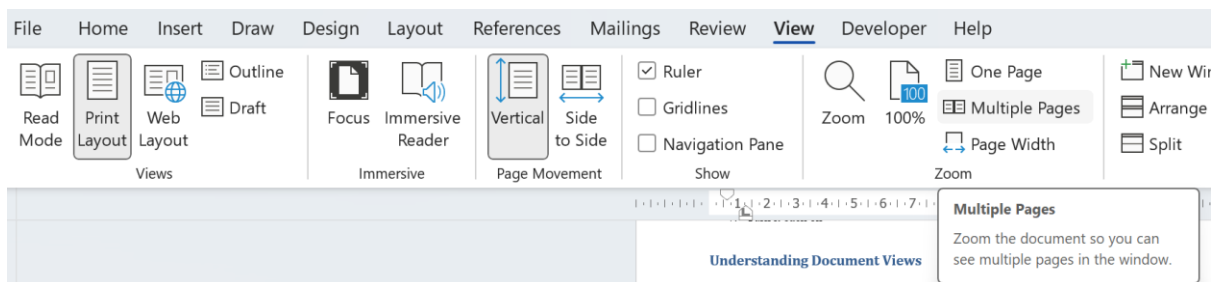

STEP 6. Changing your document view

You should use Print Layout view for most MS Word documents.

Check you are in **Print Layout** view now:

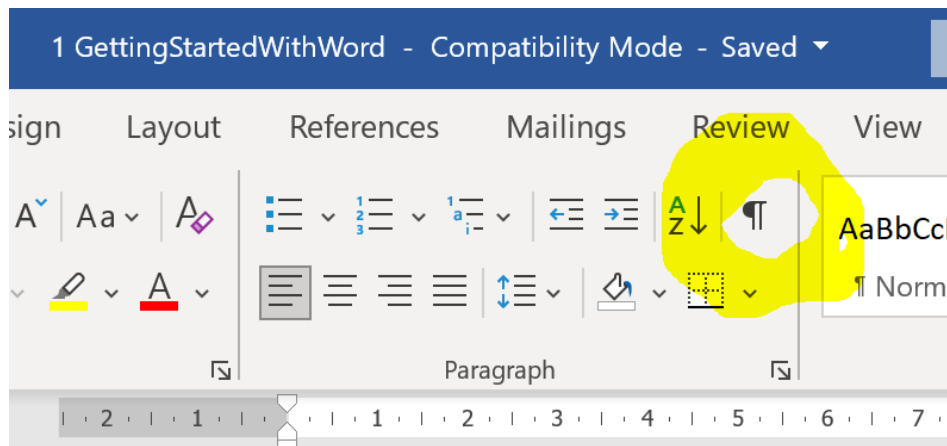

1. Click the View tab.
2. Click **Print Layout** in the Document Views group

NOTE: The corresponding shortcut area on the Status Bar (look beside the clock)

3. Change it "Multiple Pages" for "Print Layout"
4. Revert it back to "One Page" (zooming in/out as needed)

STEP 7. View nonprinting characters:

1. Choose the Home tab.
2. Click the Show/Hide button ¶ in the Paragraph group. The Show/Hide button appears in a contrasting color, when it is selected.

Understanding Nonprinting Characters

Nonprinting characters:

- do not print
- will not appear in your printed document but
- do affect your document layout.

¶ is similar to an ON/OFF switch

Character	Denotes	WHERE
→	A tab	The Tab key is above the _____ button
.	A space	spacebar
¶	The end of a paragraph	Press _____ to move to a new paragraph
-----Page Break-----	The beginning of a new page	Press <u>Ctrl+Enter</u> to move to a new line
----Section Break----	The beginning of a new section	Layout/Breaks/Section Break use will allow you create different headers and/or footers

Selecting data

1. by using the arrow keys or
2. by clicking and dragging.

Create Sample Data and Select Text

If you type **=rand()** in your Word document and then press Enter (Word creates three practice paragraphs)

STEP 8. Create and Format Sample Data

Replace your existing text with this sample data:

1. Select all of your data
2. Overwrite by typing **=rand()** and press enter

Select with the Shift and Arrow Keys

1. Place your cursor before the first word ("Video") in the first paragraph.
2. Press and hold down the Shift key, which serves as an "anchor" showing where text you wish to select begins or ends.
3. Press the down arrow key until the first line of text is highlighted.
4. Press the down arrow key until the first paragraph is highlighted.
5. Click anywhere outside the highlighted area to restart.

Execute Commands with Keyboard Shortcuts

A key name followed by a plus and a letter means to hold down the key while pressing the letter.

For example, **Ctrl+b** means you should **hold down the Ctrl key while pressing "b."**

STEP 9. Complete the Shortcuts

* Write your full name

* select it

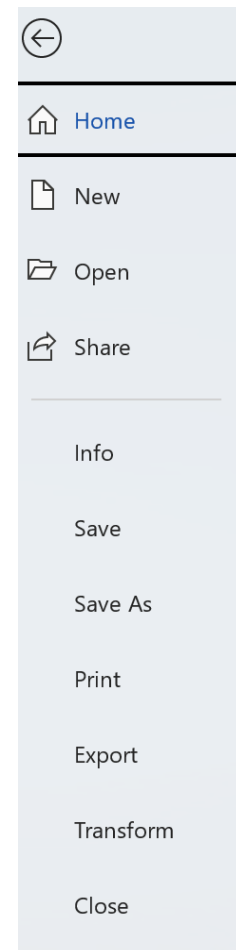

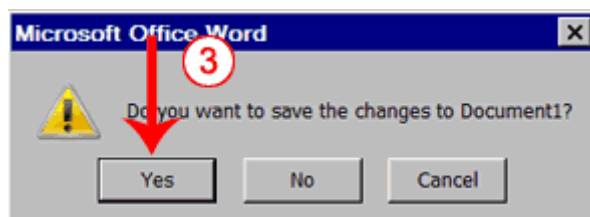

* Press Ctrl+b

Keyboard Shortcut Keys	Action
CTRL+b	Bold text
	Italics text
	Cut
	Copy
	Paste
	Copy formatting
	Start a new paragraph
	Start a new page
	Move to beginning of a line
	Move to beginning of a document
	Move to end of a line
	Move to end of a document
	Quick Save
	CAPITALISE only small no. of characters
	Add a € sign
	Add a special char i.e. Siobhán. Seán
	Show Ruler on top
	Minimise all windows
	Open Windows Explorer

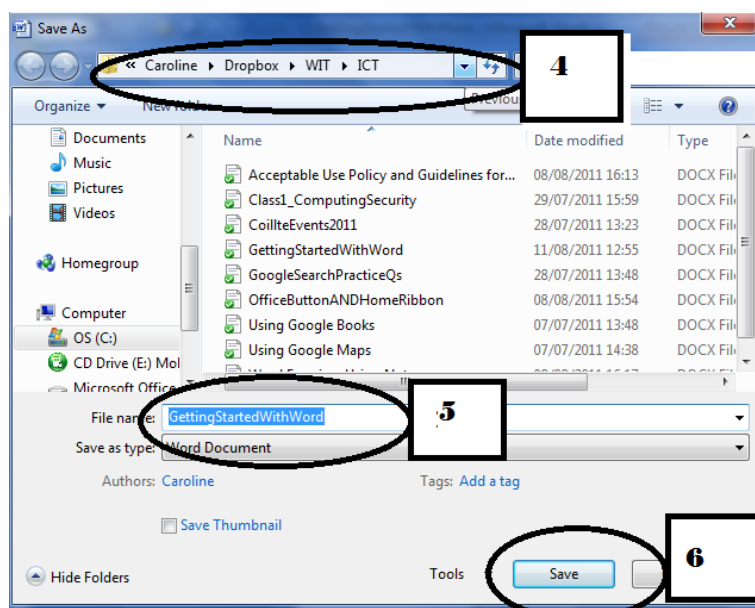

STEP 10. Save to OneDrive

1. Click the Microsoft Office button.

2. Click **Close**

3. Select where you wish to save your file: can you access **OneDrive** and **Save** to your suitably named folder from last class?

BE CAREFUL & save to OneDrive

SETU ON CAMPUS COMPUTERS:

DO NOT SAVE TO "MY DOCUMENTS"

as this is on the physical machines C drive

If you store on the SETU machine, it will be deleted!

STEP 11. Check your file is stored

Click the Windows button & press the letter _____
